

## Cash@Will™ Cash Management Solution

Cash@Will™ from Nucleus Software is comprehensive cash management solution that provides edge to banks through flexible, speedy and efficient execution of cash management processes.

### Corporate Internet banking

Banking is no longer confined to the branches. There is an increasing demand from bank's customers to have easy and fast access to basic banking services. Customers are being provided with multiple modes of accessing banking transactions, including phone banking and banking through ATM. Internet banking is the latest in this array. During the course of time, Internet has become less expensive and available for customers to access information, exchange products and services world wide from their personal computers at home and at work. The increasing population of Internet customers has an impact on banking services provided by many banks and force them to extend their banking services to customers on the Internet. Many new Internet based banking services have been initiated and launched into the market and attract both old and new customers to continue their services with the banks.

The mantra of modern day banking is to offer the customer a wide choice of delivery channels, each designed to suite the customer's convenience and also to be able to deliver the maximum services from the location of his choice. BankOnet is an Internet banking solution from Nucleus Software which offers the bank's customers one more delivery channel, providing the customer the convenience to bank from his office, home and in today's wireless technology even when on the road. BankOnet is a powerful Internet banking platform from Nucleus Software that fully exploits the Internet to boost a bank's relationship with customers.

BankOnet the Internet banking front end can be interfaced with the bank backend processors to provide the customer with a wide range of services for which he is eligible and has subscribed. The services can be accessed by establishing secured connections to the bank's website using Internet browser software.
